15-121 Fall 2018 Quiz 3

Up to 15 minutes. No calculators, no notes, no books, no computers. Show your work!
There are questions on *both sides* of this paper.

1. (10 points) **Free Response:** Write the public, static method `isIncreasing` which, given an array of integers `arr`, returns `true` if the integers are stored in increasing order and `false` otherwise.

2. (4 points) **Short Answer**

In just a few words, what's the difference between a checked and unchecked exception?

3. (6 points) **Code Tracing:** Indicate what the following program prints. Place your answer (and nothing else) in the box under the code. Note that there are two print statements.

```
public class Quiz3Ct {  
    int[] data;  
  
    public Quiz3Ct(int a, int b) {  
        data = new int[b-a];  
        for(int i = 0; i < b-a; i++) {  
            data[i] = a+i;  
        }  
    }  
  
    public int mystery() {  
        int a = data.length/2;  
        int b = 0;  
        for(int i = 0; i < a; i++) {  
            int c = data[i];  
            b += c;  
            data[i] = data[data.length-i-1];  
            data[data.length-i-1] = c;  
        }  
        return b;  
    }  
  
    public String toString() {  
        return "121: "+Arrays.toString(data);  
    }  
  
    public static void main(String[] args) {  
        Quiz3Ct var = new Quiz3Ct(5,10);  
        System.out.println(var.mystery());  
        System.out.println(var);  
    }  
}
```
